

Sola Skylights are proud to introduce the
NEW SKY TUNNEL XL²,
the latest advance in
Light Tunnel Design

Sola SkyLights

Sky Tunnel XL²

- A** Interchangeable vent or solid tabs option with each Sky Tunnel
- B** Easy fit tube attachment
- C** Easy fit magnetic double glaze ceiling diffuser

Sola Skylights offer one of the easiest and most affordable ways to bring daylight into traditionally low or no-light interiors, at home and in the working environment, with the added benefit of ventilation if required.

Natural lighting within the home or workplace is of fundamental importance for the well-being, efficiency and safety of people within that environment. Recent research suggests that the optimum quantity of rooflights required, in order to reduce a building's carbon footprint, is between **15 – 20%** of the roof area when used in conjunction with lighting controls.

Whatever your natural lighting requirements, Sola SkyLight will have a rooflight solution to meet your needs.

If you have a specific project for which you require more information, a specification or a quotation, the Sola SkyLight technical staff will be able to help you. CALL US NOW.

The Sky Tunnel XL², now even easier to install and low profile square roof dome.

- Low profile square roof dome engineered for maximum light transmission
- Adjustable ventilation option with each skylight
